

Melamine Wood Finish

GCI Melamine Wood Finish is an acid curing two pack transparent Gloss/Matt Wood Finish offering a hard, high solids film build with excellent Gloss and Clarity. It has been specially formulated with Non-yellowing and Mar resistance properties. It gives greater resistance to water, alcohol, food acids, etc.

Finish :

Gloss, Matt and Satin

Method of Application	Spray
Dilution	GCI Melamine Thinner (MT)
Drying Time	Surface Dry 60-90 mins @ 25°C
Theoretical Coverage Area	80 – 85 sq. ft / litre @ 40 microns DFT
Packaging	1ltr, 4ltr & 20ltr

Benefits :

Quick Drying and Good Stackable Nature – These properties make Melmine wood finish a preferred choice for high productivity area.

High Gloss Retention – Due to its superior surface build, the gloss levels do not sink, fade and dull out. This retention does showcases the furniture as new for longer periods.

Resistance to Water and Household Chemical – It is an excellent choice for commercial and household furniture due to its water-resistant properties.

Non-Yellowing – The special polyester formulation in the Melmine Wood finish resists yellowing for a longer duration.

Durability with Smooth Finishing – The film produced by the Melmine finish is hard and hence can withstand rough work on its surfaces

A Self-Sealing Product – Melmine Wood Finish has been formulated as a self-sealing product and therefore no separate sealer is required.
