

NC Sanding Sealer

A fast drying premium Sanding Sealer, based on alkyd-nitrocellulose combination. It has good leveling, filling and sanding property. The dried film has excellent transparency and wood grain retention.

Area of usage

Used for leveling and filling of wooden surfaces, where wooden grains are important and transparency is required. Best used for wooden furniture, toys, shop fittings, doors, cabinets, desks, wall paneling and interior wood work.

Method of Application	Brush, Polish Cloth, Spray
Dilution	GCI NC Thinner
Drying Time	Surface Dry 20-25 mins @ 25°C
Theoretical Coverage Area	110 – 120 sq. ft / litre @ 40 microns DFT
Packaging	500ml, 1ltr, 4ltr & 20ltr

Benefits :

Fast drying and excellent filling property means that the number of topcoats can be kept to a minimum.

Effortless manual sanding

Sound and smooth surface appeared after sanding.

Works well on all wooden surface.
